

Deerland Probiotics AP Automation Case Study

ERP: Ross by Aptean

"With APSmart we have been able to transform a 100% manual AP process to a streamlined system that is automated in terms of data entry, routing, approvals, and coding..."

- Pam Freeman, Controller

Deerland Probiotics partnered with CloudX in 2020 by adopting the APSSmart AP Automation solution. Here's what happened:

The AP department gained 24/7 digital access to POs, invoices, and supporting documents.

24/7

Deerland Probiotics started saving an average of \$7 in processing costs per invoice.

Invoices began posting to Deerland's ERP within an hour of processing.

Time spent emailing for approvals, gathering audit samples, and searching for invoices reduced significantly.
